Department of Control System and Instrumentation Engineering,
King Mongkut's University of Technology Thonburi, **KMUTT**

Install Virtual Serial Port Driver

- 1) Download the **VSPD** installed from the [GitHub/resources/software-tools](#)
- 2) Extract the **virtual-serial-port-driver-6.9.rar** to a temporal directory.
- 3) In the extracted directory, **Right-click** on the **vspd.exe** and choose **Run as administrator**
- 4) After the installation is completed, **copy** the **vspdctl.dll** and **paste** (replace) it into the installed directory, e.g., C:\Program Files (x86)\Eltima Software\Virtual Serial Port Driver 6.9

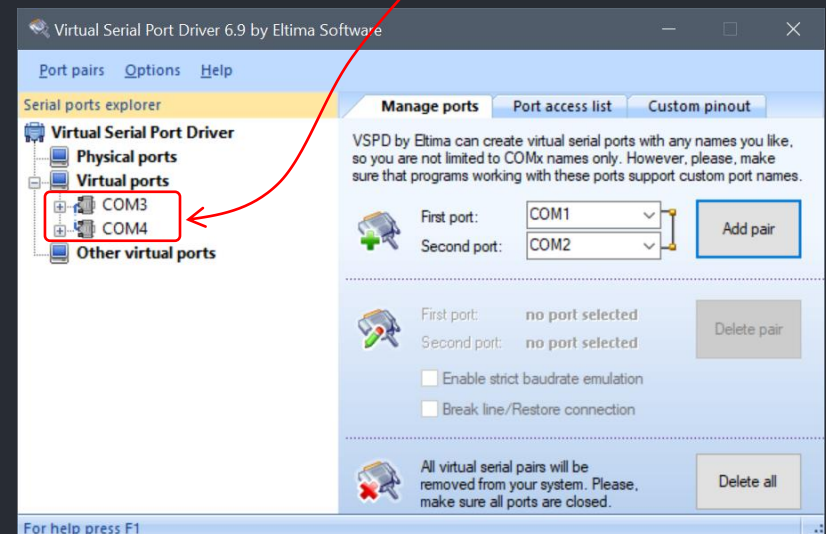

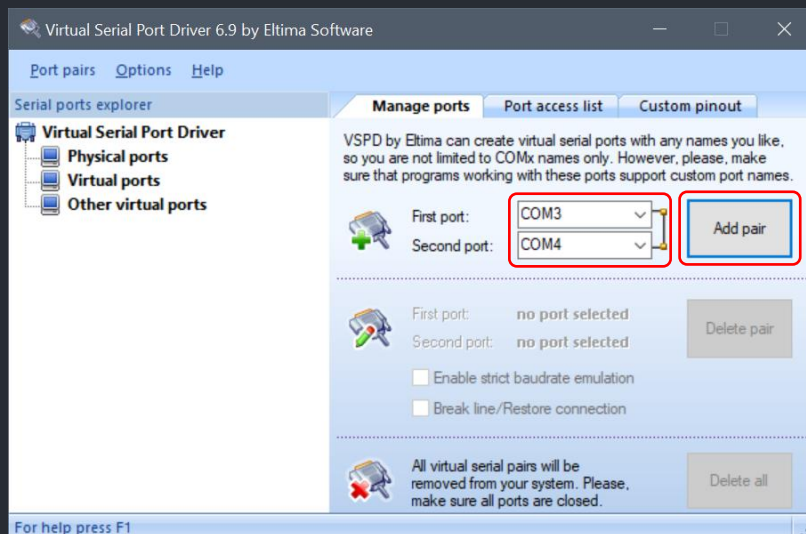

Run the Virtual Serial Port Driver

5) Run the VSPD by clicking on its **shortcut** and choose **Run as administrator**

6) Let's create a pair of port by change the **First port** and **Second port** to **COM3** and **COM4** and then click the **Add pair** button

After the Add pair button is clicked, the created pair of the ports will be shown in the list of the Virtual port

THANK YOU!
